Agent-based and Individual-based Modeling: *A Practical Introduction*
Steven F. Railsback and Volker Grimm
Princeton University Press, 2012

Location	Correction	Date added
Preface, page xiii Ch. 2, page 15	At first mention of NetLogo we should have cited: Wilensky, U. (1999). NetLogo. http://ccl.northwestern.edu/netlogo/ . Center for Connected Learning and Computer-Based Modeling, Northwestern University, Evanston, IL.	18 Oct 2011
Section 5.4, page 68	Replace this statement: <pre>export-plot "Corridor width" word "Corridor-output-for-q-" q</pre> with this: <pre>export-plot "Corridor width" (word "Corridor-output-for-q-" q ".csv")</pre> <p>The revised statement appends the file extension “.csv” to the file name created via the <code>word</code> primitive. Note that when <code>word</code> is used to concatenate more than two values together, it and all the values must be inside parentheses.</p>	2 Nov 2011
Chapter 13, Exercise 1	This exercise can be more clearly defined. Assume that “the number of sales that a telemarketer must make to stay in business” refers to the minimum number of sales needed to keep from immediately going out of business when the telemarketer grew on the previous time step.	11 Nov 2011
Section 20.5, page 264	The first bullet of the description of the simple trait for how subordinate adults decide whether to scout should say “If there are no <i>older</i> subordinate adults” instead of “other subordinate adults”.	25 Oct 2011
